Operational Report

Multiplying the circulating supply of **9,211.3376 USDV** by it's Pegg price of **\$1.25** gets us **\$11,514.172** worth of **USDT**. The USDV Contract currently holds **\$11,517.59 USDT** backing. This means there currently exists **\$3.41** Extra Reserve Liquidity of **USDT** backing **USDV** beyond what is needed if all **USDV** were Redeemed at once. Taking all of our assets held on hand taken into account as well as the circulating supply we calculated a current intrinsic value of **1.3005 USDT** backing value for USDV with reserves.

Our Extra Reserve Liquidity is **0.002774** with a dollar value of **\$243.26** which is down due to the market downturn. We will be increasing our extra reserve liquidity as soon as we are able to ensure peg price adjustment for January 2026.

Lumariom Onlines' public beta will soon launch as we said in the last update. Despite some delays the team is diligently finishing up the email module for release. UI UX for the social module are nearly complete. Development on these will start next.

In closing, our games department while a background focus is coming along with our various partners & collaborations. We will have more to share about Lumariom Online & the games department very soon.
